

## WHAT IS CLAIMED IS:

Sub  
B1

1. A golf club comprising:  
a shaft; and  
a metal head attached to the shaft, the metal head including a plurality  
5 of metal pieces fixed together by means of laser welding.

2. A golf club according to claim 1, wherein metal pieces appearing on  
a common surface of the head are fixed together by means of laser welding.

15

3. A golf club according to claim 1 or 2, wherein metal pieces having  
different thicknesses are fixed together by means of laser welding.

4. A golf club according to any one of claims 1 to 3, wherein metal  
pieces made of different metals are fixed together by means of laser welding.

5. A golf club according to claim 4, wherein the difference in melting  
temperature between the metal pieces is 250°C or less

Sub  
A2

6. A golf club according to claim 4 or 5, wherein at least 60% of the  
20 respective metal pieces are made of the same metal.

Sub  
B2

7. A golf club comprising:  
a shaft; and  
a metal head attached to the shaft, the metal head including a portion  
25 formed through plastic working of a compounded metal plate fabricated  
through joining a plurality of metal plates by means of laser welding.

8. A golf club according to claim 7, wherein the compounded metal plate is fabricated through mutual fixing of metal pieces which appear on a common surface of the head, the mutual fixing being effected by means of laser welding.

5

Sub  
B3

9. A golf club according to claim 7, wherein the compounded metal plate is fabricated through mutual fixing of metal pieces which have different thicknesses, the mutual fixing being effected by means of laser welding.

10

10. A golf club according to claim 7, wherein the compounded metal plate is fabricated through mutual fixing of metal pieces made of different metals, the mutual fixing being effected by means of laser welding.

15

11. A golf club according to claim 10, wherein the difference in melting temperature between the metal pieces is 250°C or less

12. A golf club according to claim 10, wherein at least 60% of the respective metal pieces are made of the same metal.
